Objective

Motivated and detail-oriented Software Engineer with over 3 years of experience in software development, including proficiency in JavaScript, Python, and Java. Adept at collaborating with cross-functional teams to design, develop, and maintain scalable software solutions. Passionate about continuous learning and staying up-to-date with emerging technologies to deliver high-quality products.

Technical Skills

- **Programming Languages:** JavaScript, Python, Java, C++

- **Web Development:** HTML, CSS, React, Node.js

- **Databases:** MySQL, MongoDB, PostgreSQL

- **Version Control:** Git, GitHub

- **Cloud Services:** AWS, Google Cloud

- **Containerization:** Docker, Kubernetes

- **CI/CD Tools:** Jenkins, GitLab CI

- **Frameworks/Libraries:** Express.js, Spring Boot, Django

- **Other:** Agile Development (Scrum, Kanban), REST APIs, Microservices Architecture

---

Professional Experience

Software Engineer

Tech Solutions Inc. | New York, NY | June 2021 – Present

- Design, code, test, and deploy software solutions for an e-commerce platform, improving functionality and performance by 30%.

- Collaborate with product managers, designers, and other engineers to gather requirements and translate them into technical specifications and user-friendly applications.

- Participate in code reviews and debugging, ensuring code quality, maintainability, and high performance.

- Engage in agile methodologies, managing tasks in weekly sprints and contributing to continuous improvements.

- Write comprehensive documentation for APIs, system designs, and user guides.

- Lead technical mentorship for junior developers, fostering an environment of collaboration and knowledge sharing.

Junior Software Engineer

Innovative Systems LLC | San Francisco, CA | May 2019 – May 2021

- Developed and maintained web applications using JavaScript and Python, focusing on clean, scalable, and testable code.

- Contributed to the design and implementation of database solutions, integrating both SQL and NoSQL databases for various project needs.

- Worked closely with senior developers to understand and implement software development best practices.

- Assisted in the implementation of automated CI/CD pipelines using Jenkins and GitLab.

Education

Bachelor of Science in Computer Science
University of California, Berkeley | Berkeley, CA | Graduated May 2019

Projects

- **Online Store Application**
  Technologies Used: React, Node.js, MongoDB
  Designed and implemented a full-stack web application for an online store that allows users to browse products, make purchases, and track orders. Integrated a MongoDB database to handle user data and leveraged React for a dynamic front-end experience. Deployed the application using AWS EC2 and Docker containers.

- **Task Management API**
  Technologies Used: Python, Django, PostgreSQL
  Developed a RESTful API for managing tasks in a to-do list app, implementing CRUD operations and security measures. Utilized Django for rapid development and PostgreSQL for data storage. Deployed on Google Cloud Platform.

Certifications

- AWS Certified Solutions Architect – Associate | June 2022

- Google Cloud Professional Cloud Architect | August 2022
- Docker Certified Associate | November 2021

Soft Skills

- Strong problem-solving abilities
- Excellent communication and collaboration skills
- Adaptability in fast-paced, iterative development environments
- Proactive approach to learning and applying new technologies
